## PROJECTS

**Ecommerce Application (Flipkart-Clone)**
Ecommerce application using React, Nodejs, MongoDB No-SQL Database

Flipkart-Clone is an ecommerce portal for ordering multiple items (Cloths, groceries etc.) and can be used as a mobile app as well as web app. This is a Microservice based application using React JS for client-side communication. This is a platform to onboard traders selling different products and to accept orders from different consumers. We have different algorithm for traders to accept orders for different products. Consumers or buyers can place order onto the portal in through uploading image of list of items, and selecting products from the application and placing the order. We used paytm as payment gateway and implemented escrow to store payment from users and products from traders to minimize disputes.
Role - Frontend Developer, Writing and maintaining code quality with product standards. Gather product feature and requirements, design and develop APIs
Tools and Technologies - Node Js, Express, React Js, Paytm Payment gateway, Mongo DB
